

NUNO SANTOS

Computer Science & Engineering — Full-Stack & IoT Developer

Viseu, Portugal | +351-912012992 | nunogoncalobsantos@gmail.com
linkedin.com/in/nunogonsantos | github.com/Rekrl

PROFILE

Computer Science & Engineering student with a Level-5 Technical Specialist qualification in Management Information Systems. Full-stack and IoT developer who most recently built an end-to-end Industrial IoT platform — from edge firmware to real-time dashboards and anomaly detection — during a software engineering internship with the STAR Institute. Comfortable across the stack (React, Node.js, Flutter, Python/FastAPI, embedded C++), with a genuine interest in practical AI applications and smart-city / IoT systems that connect software to the physical world. Excellent communicator with near-native English, fast learner, and strong problem-solving skills honed through 5+ years of competitive basketball.

EXPERIENCE

Software Engineering Intern (IIoT Platform)

Feb 2026 – Jun 2026

STAR Institute — Science Technology Applied Research, Viseu, Portugal

- Designed a three-tier (Edge / Platform / Business) architecture for an end-to-end IIoT platform, containerized with Docker
- Built C++ (PlatformIO) firmware on ESP32-S3 edge devices collecting energy, vibration and environmental data over Modbus RTU/RS-485 and I2C
- Developed a Node.js MQTT-to-InfluxDB pipeline with sensor-agnostic parsers, a real-time Socket.io dashboard, and a Python/FastAPI service for statistical anomaly detection

Professional Internship

2023

Tek4You

- Diagnosed and repaired PCs/laptops, installed accessories and provided in-store technical support
- Built and deployed the company's official website with product catalog and WhatsApp API integration
- Assisted customers and managed stock in a retail environment

Retail & Warehouse Operator

2018 – 2022

Jerónimo Martins — Pingo Doce

- Customer service, cash register operation and shop floor support
- Warehouse management, inventory counts and product display optimisation
- Excelled in high-pressure environments and team coordination

PROJECTS

IIoT Trace

ESP32-S3 · MQTT · InfluxDB · FastAPI · Docker

Industrial IoT platform for real-time monitoring & predictive maintenance, built with STAR Institute.

E-Learning Platform

React · Node.js · Flutter · PostgreSQL

Integrated project (Grade: 19/20). Full-stack e-learning web + mobile app.

Tek4You Website

Business Site · WhatsApp API

Official showcase & contact site for an IT retail store, with product catalog.

EDUCATION

Computer Science and Engineering

2023 – 2026

Instituto Politécnico de Viseu

Technical Specialist — Mgmt. Informatics Applications (Level 5)

2022 – 2023

Cesae Digital

SKILLS

Languages	JavaScript (ES6+), Python, C/C++, PHP, Dart
Frontend	React, Bootstrap, HTML5/CSS3, Flutter
Backend	Node.js, Express, Socket.io, FastAPI, PHP
IoT / Embedded	ESP32-S3, PlatformIO, MQTT, Modbus RTU/RS-485, I2C
Data / Ops	InfluxDB, PostgreSQL, MySQL, MongoDB, Docker

LANGUAGES

Portuguese	Native
English	Near-native (C2)
French	Fluent speaking
